Re: Papa Johns
ADA Compliance Evaluation

Dear Mr. Shore:

As requested, I visited the above-referenced property to conduct visual observations in order to provide this ADA compliance evaluation of the KAIS ABID, d/b/a PAPA JOHN'S, KAM FOUR, INC, d/b/a PAPA JOHN'S, PARKER EAST 24th APARTMENTS, LLC and PARKER COMMERCIAL 24th ASSOCIATES and 305 EAST 24TH OWNERS CORP located at 432 Second Ave. New York, New York.

This evaluation addresses the requirements for providing accommodations for accessible access from the sidewalk and through the space. The intent of this project was for New York Engineers, LLC to render an opinion as to the extent of any issues believed to represent a violation of any applicable federal, New York State, or New York City barrier-free codes.

Throughout this letter report, the term "ADA", which stands for "The Americans with Disabilities Act" is used as a generic reference for all applicable barrier-free codes, laws and guidelines that pertain to accessibility – specifically, the following:

- The Americans with Disabilities Act (ADA).
- New York State Executive Law: Article 15: the Human Rights Law.
- Administrative Code of the City of New York § 8-107.
- NYC City Local Law 58 of 1987 (LL58/87) (amendment to NY City's Building Code).
- The 2010 Standards for public accommodations and commercial facilities, consisting of the Title III regulations at 28 CFR Part 36, subpart D, and the 2004 ADAAG.

In order to enter the space through the entrance along the sidewalk of 2 Av., a person must descend two (2) steps of unequal riser height (6" and 7") and unequal tread depth.

Once inside the space, there is an unsecured door mat. An inaccessible service and transaction counter located in the establishment 41-" high. No ADA signage inside the space exists. ADA signage on the outside doesn't contain proper size font, or brail. A buzzer¹ was present to signal for a temporary ramp, but no ramp was in the space. There was no seating in the space².

See the Appendix with pictures of the inspection.

Modifications can be made without much difficulty and expense to make the facilities more accessible and barrier free. In order to accomplish this task, the following items would need to be addressed:

1. *Entrance steps and doorway:* To address this condition, a permanent small ramp can be constructed from the sidewalk level up to the main floor level; the ramp would require appropriate slope, railings, and signage as required by 28 C.F.R. 36 to provide an accessible and properly designated entrance. In the alternative, a wheelchair lift may be used. In the alternative, an ADA compliant portable ramp with a non-slip surface may be used in conjunction with ADA accessible signage and buzzer to comply with 28 C.F.R. Part § 36.304 (e).¹ A cost estimate of providing an ADA compliant wheelchair lift is approximately \$10,000.

2. *Transaction counter:* The existing non ADA compliant transaction counter can be modified to comply with 28 C.F.R. Part 36, Section 7.2(1), which requires that a portion of the main counter (measuring a minimum of 36 inches in length) be provided, with a maximum height of 36 inches above the finished floor. The cash register display screens should be lowered with the transaction counter. A cost estimate of lowering the transaction counter is \$2,000.

3. *Service Counter:* The existing non ADA compliant service counter can be modified to comply with 2010 ADAAG, Section 902.3 which requires a portion of the main counter (measuring a minimum of 36" in length) be provided with a maximum height of 36" above the finished floor. The cost estimate of lowering the service counter is the same as the cost for lowering the transaction counter.

4. *Signage:* Appropriate visual and/or tactile signage regarding services available should be provided to comply with 28 C.F.R. Part 36, Section 4.1.3(16) and 28 C.F.R. Part 36, Section 4.30.4. A cost estimate of providing appropriate signage is approximately \$200.

5. *Secured Mats:* The existing non ADA compliant mats in the store layout can be secured to be in compliance with 28 C.F.R. Part 36 and 2010 Standard, Section 302.2.

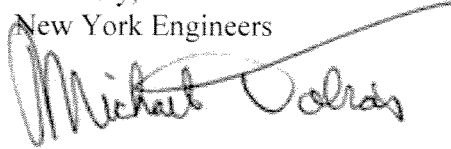

Based on the above analysis, it is my professional opinion that the subject premises is noncompliant with the ADA and New York City and New York State applicable Laws; it is recommended that Compliance Policies and Procedures be established along with the corrective actions needed to insure compliance with ADA.

¹ The ADA signage and buzzer were not present during an informal pre-suit inspection conducted by New York Engineers, LLC in November of 2012.

² Inaccessible seating was present during an informal pre-suit inspection conducted by New York Engineers, LLC in November of 2012

Thank you for the opportunity to be of service.

Sincerely,
New York Engineers

I have Bachelors of Science in Mechanical Engineering with Honors from Georgia Tech. I am a licensed Professional Engineer in multiple states including NY. Being the Principal in an architectural engineering firm, I'm responsible for overall project execution and quality. Over 100 architectural engineering projects and surveys have been successfully completed by me. The New York City Building Code and designing for ADA Compliance are intimately familiar to me.
